Contents Volume 168

1 Single item lot sizing problems
N. Brahimi, S. Dauzere-Peres, N.M. Najid and A. Nordli
17 Integration of pricing and capacity allocation for perishable products
Y. Feng and B. Xiao
35 The relationship between organization strategy, total quality management (TQM), and organization performance—the mediating role of TQM
D.I. Prajogo and A.S. Sohal
51 Retailer's optimal pricing and lot-sizing policies for deteriorating items with partial backlogging
H.-J. Chang, J.-T. Teng, L.-Y. Ouyang and C.-Y. Dye
65 Coordination of cooperative advertising in a two-level supply chain when manufacturer offers discount
J. Yue, J. Austin, M.-C. Wang and Z. Huang
86 Optimal preventive maintenance of a production system with an intermediate buffer
E.G. Kyriakidis and T.D. Dimitrakos
100 A geometric process model for *M*/*M*/1 queueing system with a repairable service station
Y. Lam, Y.L. Zhang and Q. Liu
122 Joint statistical design of double sampling $\overline{X}$ and s charts
D. He and A. Grigoryan
143 A flexible stochastic differential equation model in distributed development environment
Y. Tamura and S. Yamada
153 A two threshold vacation policy in multiserver queueing systems
N. Tian and Z.G. Zhang
164 Knowledge acquisition in incomplete information systems: A rough set approach
Y. Leung, W.-Z. Wu and W.-X. Zhang
181 Mathematical programming based heuristics for improving LP-generated classifiers for the multi-class supervised classification problem
J. Adem and W. Gochet
200 Heuristics for selecting robust database structures with dynamic query patterns
A.N.K. Chen, P.B. Goes, A. Gupta and J.R. Marsden
221 A game-theoretic formulation of joint implementation of environmental projects
M. Breton, G. Zaccour and M. Zahaf
240 How real option disinvestment flexibility augments project NPV
A. Keswani and M.B. Shackleton
253 Do bank mergers have hidden or foregone value? Realized and unrealized operating synergies in one bank merger
H.D. Sherman and T.J. Rupert
269 Book Reviews

doi:10.1016/S0377-2217(05)00573-4

279 Preface: Mathematical Finance and Risk Assessment
T. Dohi, S. Osaki and N. Limnios
281 Price limits and capital requirements of futures clearinghouses
L. Shanker and N. Balakrishnan
291 The comparative statics on asset prices based on bull and bear market measure
M. Ohnishi and Y. Osaki
301 Monte Carlo analysis of convertible bonds with reset clauses
T. Kimura and T. Shinohara
311 An impulse control of a geometric Brownian motion with quadratic costs
M. Ohnishi and M. Tsujimura
322 Bounds for the price of a European-style Asian option in a binary tree model
H. Reynaerts, M. Vanmaele, J. Dhaene and G. Deelstra
333 Some results on symmetric duality of multiobjective programmes with generalized (F,ρ) invexity
D.B. Ojha and R.N. Mukherjee
340 A linear programming framework for free disposal hull technologies and cost functions: Primal and dual models
H. Leleu
345 Posynomial geometric programming with parametric uncertainty
S.-T. Liu
354 An evolutionary programming algorithm for continuous global optimization
Y.W. Yang, J.F. Xu and C.K. Soh
370 Scheduling orders for multiple product types with due date related objectives
J.Y.-T. Leung, H. Li and M. Pinedo
390 Using tree search bounds to enhance a genetic algorithm approach to two rectangle packing problems
K.A. Dowsland, E.A. Herbert, G. Kendall and E. Burke
403 On solving multi-type railway line planning problems
J.-W. Goossens, S. van Hoesel and L. Kroon
425 One-sided elasticities and technical efficiency in multi-output production: A theoretical framework
P. Hadjicostas and A.C. Soteriou
450 Allocative efficiency of technically inefficient production units
P. Bogetoft, R. Färe and B. Obel
463 An inventory model for deteriorating items with stock-dependent consumption rate and shortages under inflation and time discounting
K.-L. Hou
475 The application of prediction capability and adaptive target control to the newspaper business
M. Pearson
492 Cost analysis on renewable full-service warranties for multi-component systems
J. Bai and H. Pham
509 Dynamic load balancing in parallel queueing systems: Stability and optimal control
D.G. Down and M.E. Lewis
520 Quantile and tolerance-interval estimation in simulation
E.J. Chen and W.D. Kelton
541 A δ-shock maintenance model for a deteriorating system
Y.-y. Tang and Y. Lam
557 Rank from comparisons and from ratings in the analytic hierarchy/network processes
T.L. Saaty
571 A rational approach to handling fuzzy perceptions in route choice
T. Arslan and C.J. Khisty

584 Nonessential objectives within network approaches for MCDM
T. Gal and T. Hanne
593 Establish standards of standard costing with the application of convergent gray zone test
T.-y. Hsiao
612 An efficient linear model and optimisation algorithm for multi-site combined heat and power production
A. Rong, H. Hakonen and R. Lahdelma
633 Passenger grouping under constant threat probability in an airport security system
V.L. Lazar Babu, R. Batta and L. Lin
645 The impact of energy function structure on solving generalized assignment problem using Hopfield neural network
M.A.S. Monfared and M. Etemadi
655 Book Reviews

663 Guest editorial: Balancing Assembly and Transfer Lines
A. Dolgui
666 State-of-the-art exact and heuristic solution procedures for simple assembly line balancing
A. Scholl and C. Becker
694 A survey on problems and methods in generalized assembly line balancing
C. Becker and A. Scholl
716 An linear programming based lower bound for the simple assembly line balancing problem
M. Peeters and Z. Degraeve
732 A special case of transfer lines balancing by graph approach
A. Dolgui, N. Guschinsky and G. Levin
747 Cost-oriented assembly line balancing: Model formulations, solution difficulty, upper and lower bounds
M. Amen
771 An optimal piecewise-linear program for the U-line balancing problem with stochastic task times
T.L. Urban and W.-C. Chiang
783 Stability analysis of an optimal balance for an assembly line with fixed cycle time
Y.N. Sotskov, A. Dolgui and M.-C. Portmann
798 A heuristic solution for fuzzy mixed-model line balancing problem
N.V. Hop
811 A genetic algorithm for robotic assembly line balancing
G. Levitin, J. Rubinovitz and B. Shnits
826 Balancing assembly lines with tabu search
S.D. Lapierre, A. Ruiz and P. Soriano
838 An endosymbiotic evolutionary algorithm for the integration of balancing and sequencing in mixed-model U-lines
Y.K. Kim, J.Y. Kim and Y. Kim
853 Dynamic task assignment for throughput maximization with worksharing
R.G. Askin and J. Chen
870 Bucket brigades on in-tree assembly networks
J.J. Bartholdi III, D.D. Eisenstein and Y.F. Lim
880 Controlling mixed-model assembly lines in real-time by using distributed systems
S. Bock, O. Rosenberg and T. van Brackel
905 Sequencing and loading of products on a flowline
S.C. Sarin, M.P. Greco and E.M. Dar-El

922 Optimal allocation of work in assembly lines for lots with homogenous learning
Y. Cohen, G. Vitner and S.C. Sarin
932 Generation of assembly graphs by systematic analysis of assembly structures
A.J.D. Lambert
952 Three-dimensional packing of items with limited load bearing strength
E.E. Bischoff
967 Cutting plane method for multiple objective stochastic integer linear programming
M. Abbas and F. Bellahcene
985 Flexible flow shop scheduling with uniform parallel machines
G.J. Kyparisis and C. Koulamas
998 A tandem clustering process for multimodal datasets
C. Cho, S. Kim, J. Lee and D.-W. Lee
1009 Knowledge discovery using a neural network simultaneous optimization algorithm on a real world classification problem
R.S. Sexton, S. McMurtrey and J.D. Cleavenger
1019 Characterizing solutions of rough programming problems
E.A. Youness
1030 Branch-and-bound algorithms for solving hard instances of the one-machine sequencing problem
Y. Pan and L. Shi
1040 Book Reviews
